BEAR BRAND REPRESSED STEEL CEILINGS

This is our Panel Plate No. 150, which gives a correct idea of our method of steel ceiling construction, showing the perfect "repressed bead" and "punched nail hole."

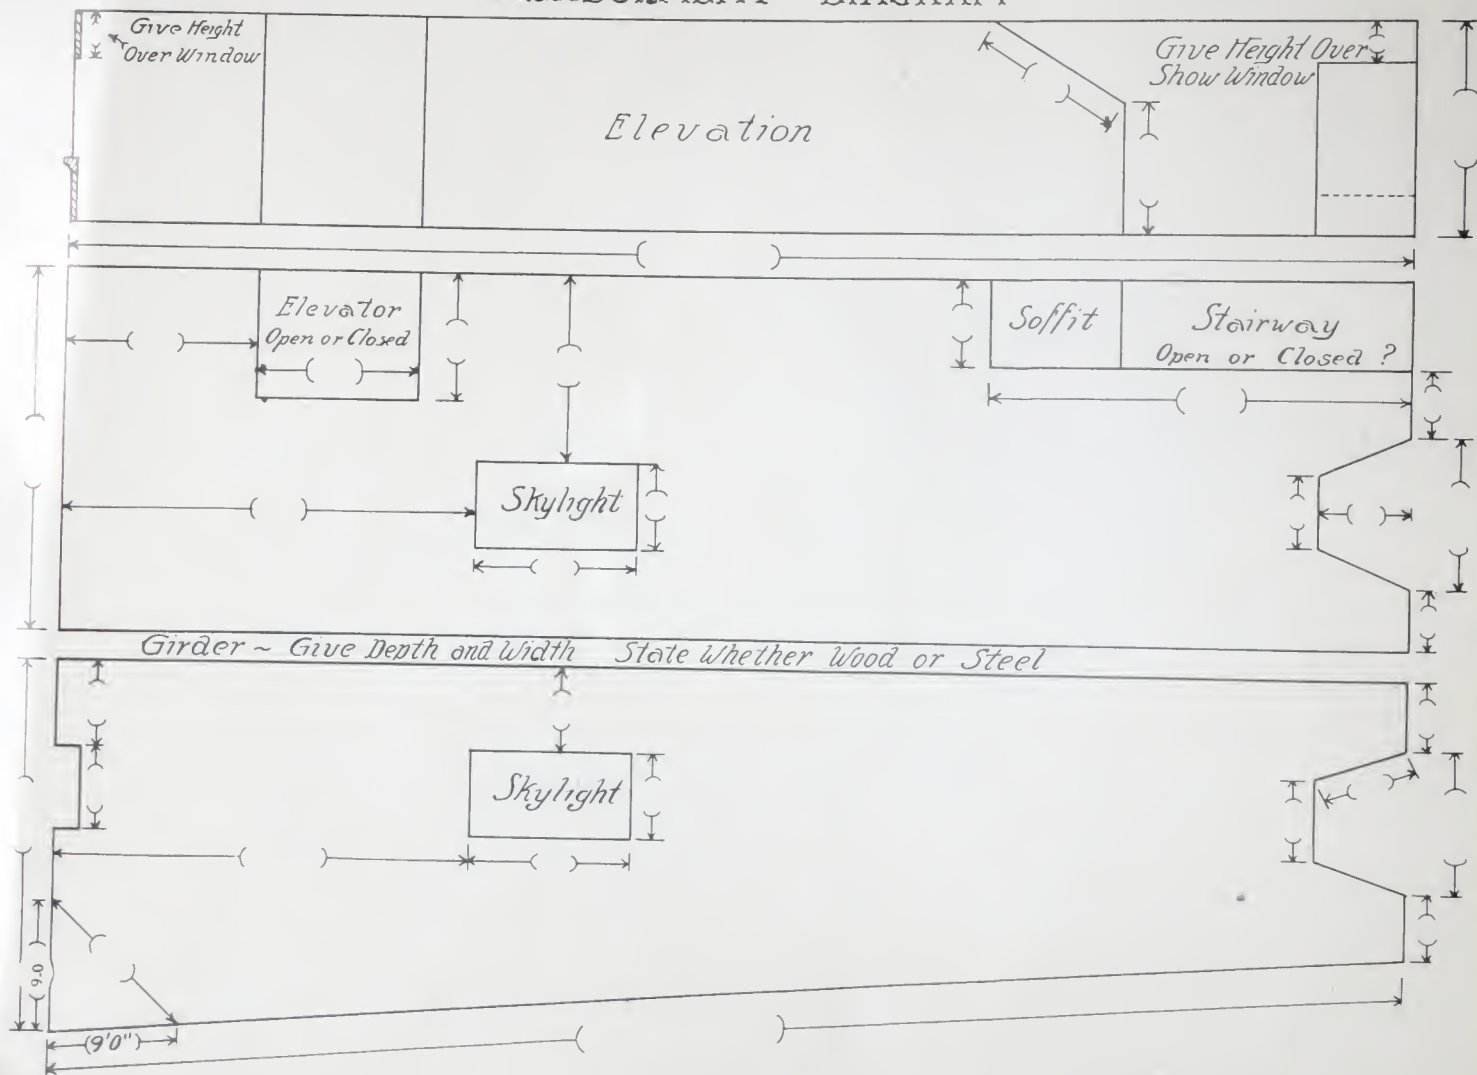

Manufactured by

Woolwine Metal Products Company

• Atlantic Boulevard and Riverside Drive •

LOS ANGELES, CALIFORNIA

MEASUREMENT DIAGRAM

RULES FOR MEASUREMENT

A correct diagram showing measurements should be furnished in order to make accurate estimates and to assist us in filling orders properly. Any other openings, girders, or offsets not indicated on diagram, page 2, should be shown, giving their sizes and location, also state whether elevator openings and stairways are open or closed.

To the length and width of the room add twice the depth of cornice, plus 6" allowance for variation, and multiply the results, which will give the amount of material required to cover the ceiling. If side wall is also desired, figure height of room from base board to ceiling.

TC Valencia Hotel, Anaheim, Cal.
